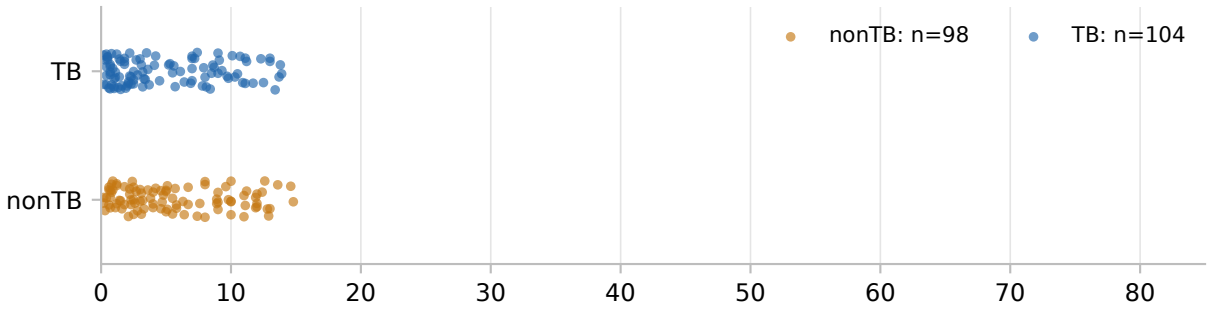
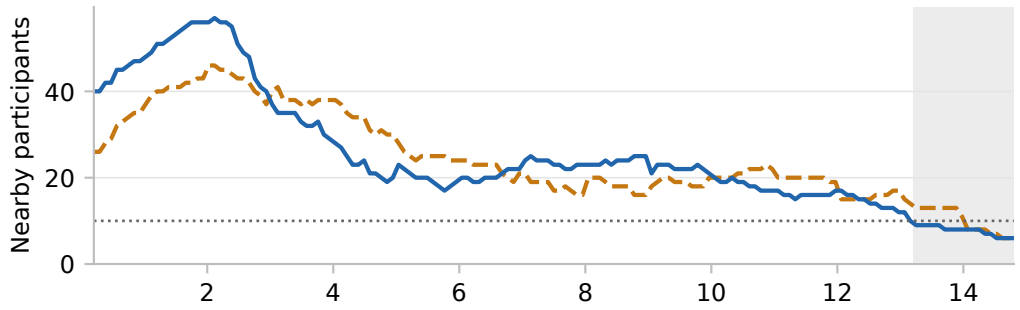
Age coverage and support for TB–nonTB comparisons

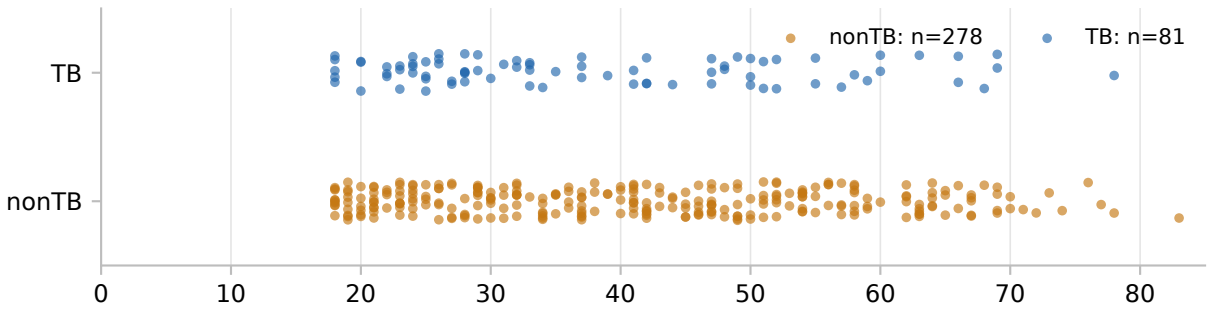
PROTECT · 202 participants



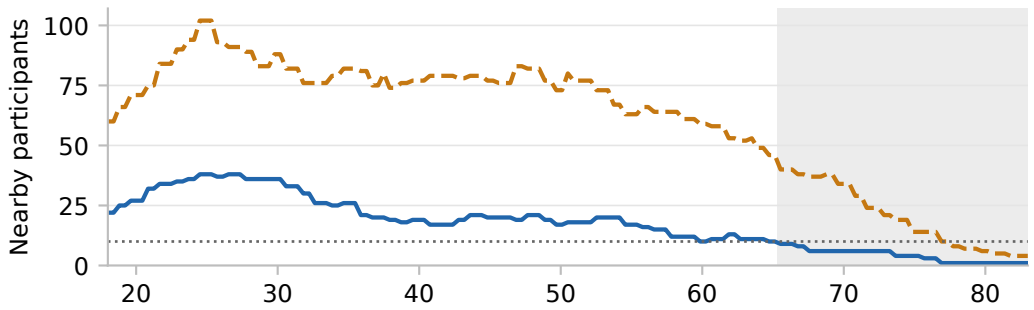
Local support · grey ages are withheld



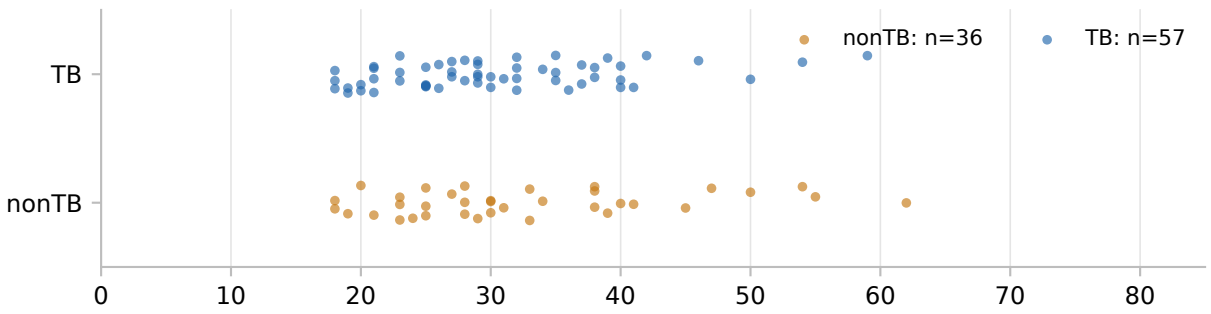
ADTB · 359 participants



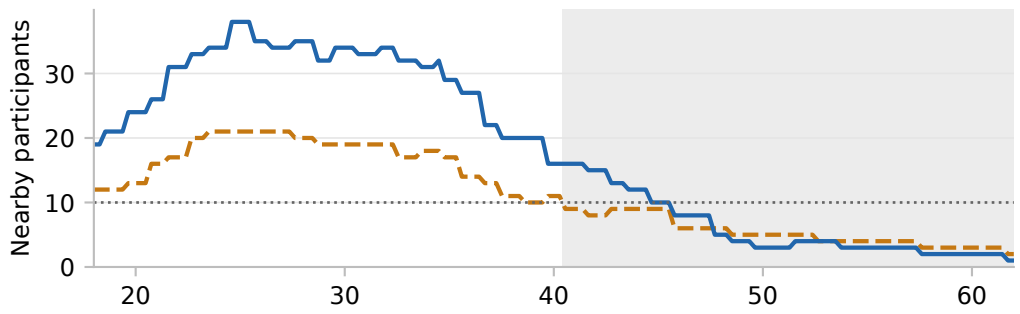
Local support · grey ages are withheld



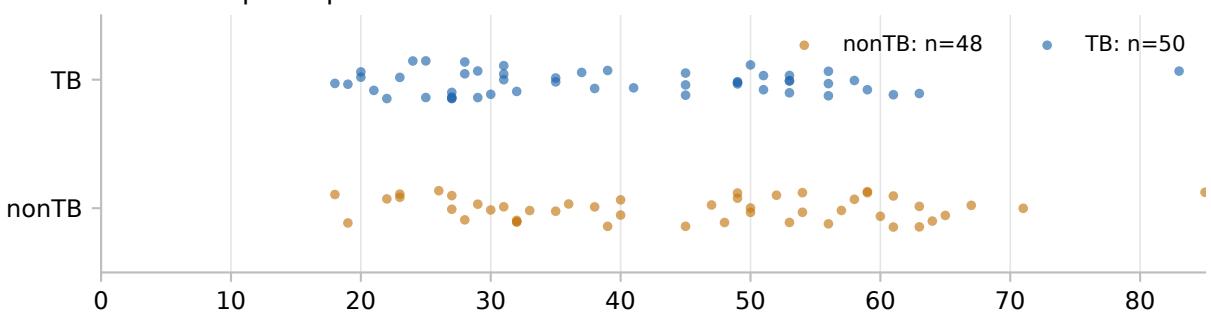
GHL · 93 participants



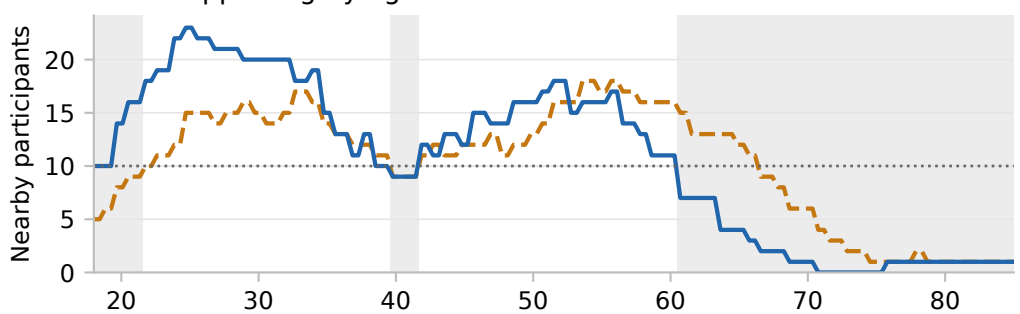
Local support · grey ages are withheld



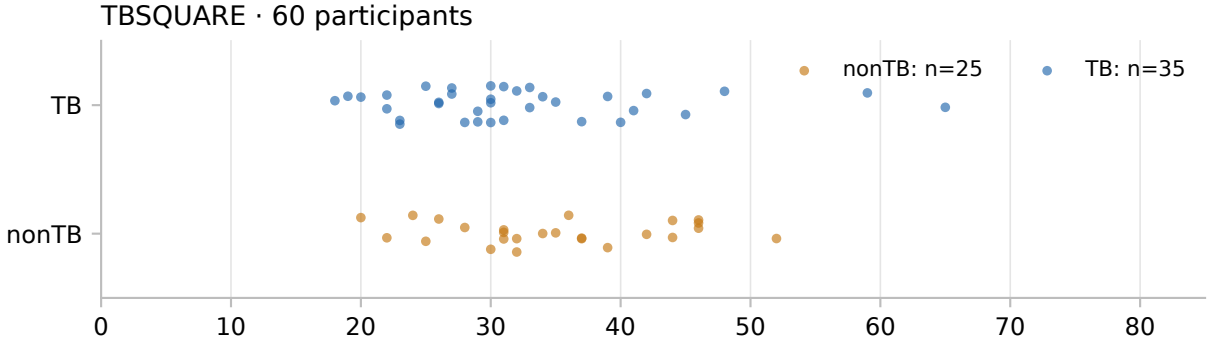
R2D2 · 98 participants



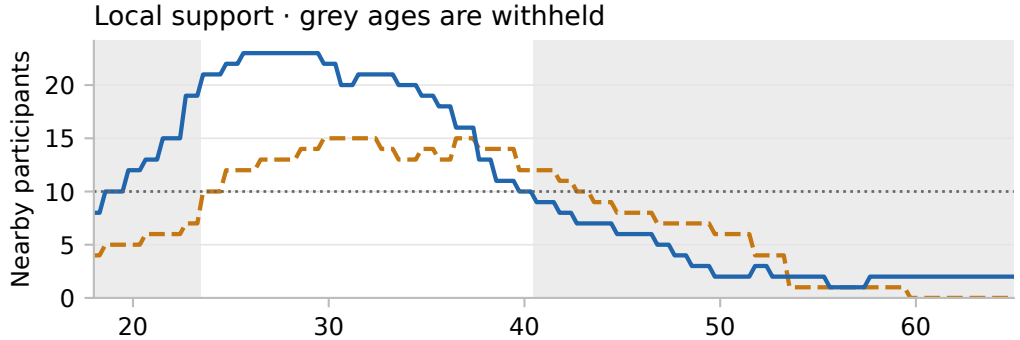
Local support · grey ages are withheld



TBSQUARE · 60 participants



Local support · grey ages are withheld



Left: one dot per participant; vertical jitter separates overlapping ages. Right: dashed orange = nonTB, solid blue = TB.
Local windows diagnose support only; the model uses continuous age. Grey also excludes ages beyond either diagnosis’s observed range.
