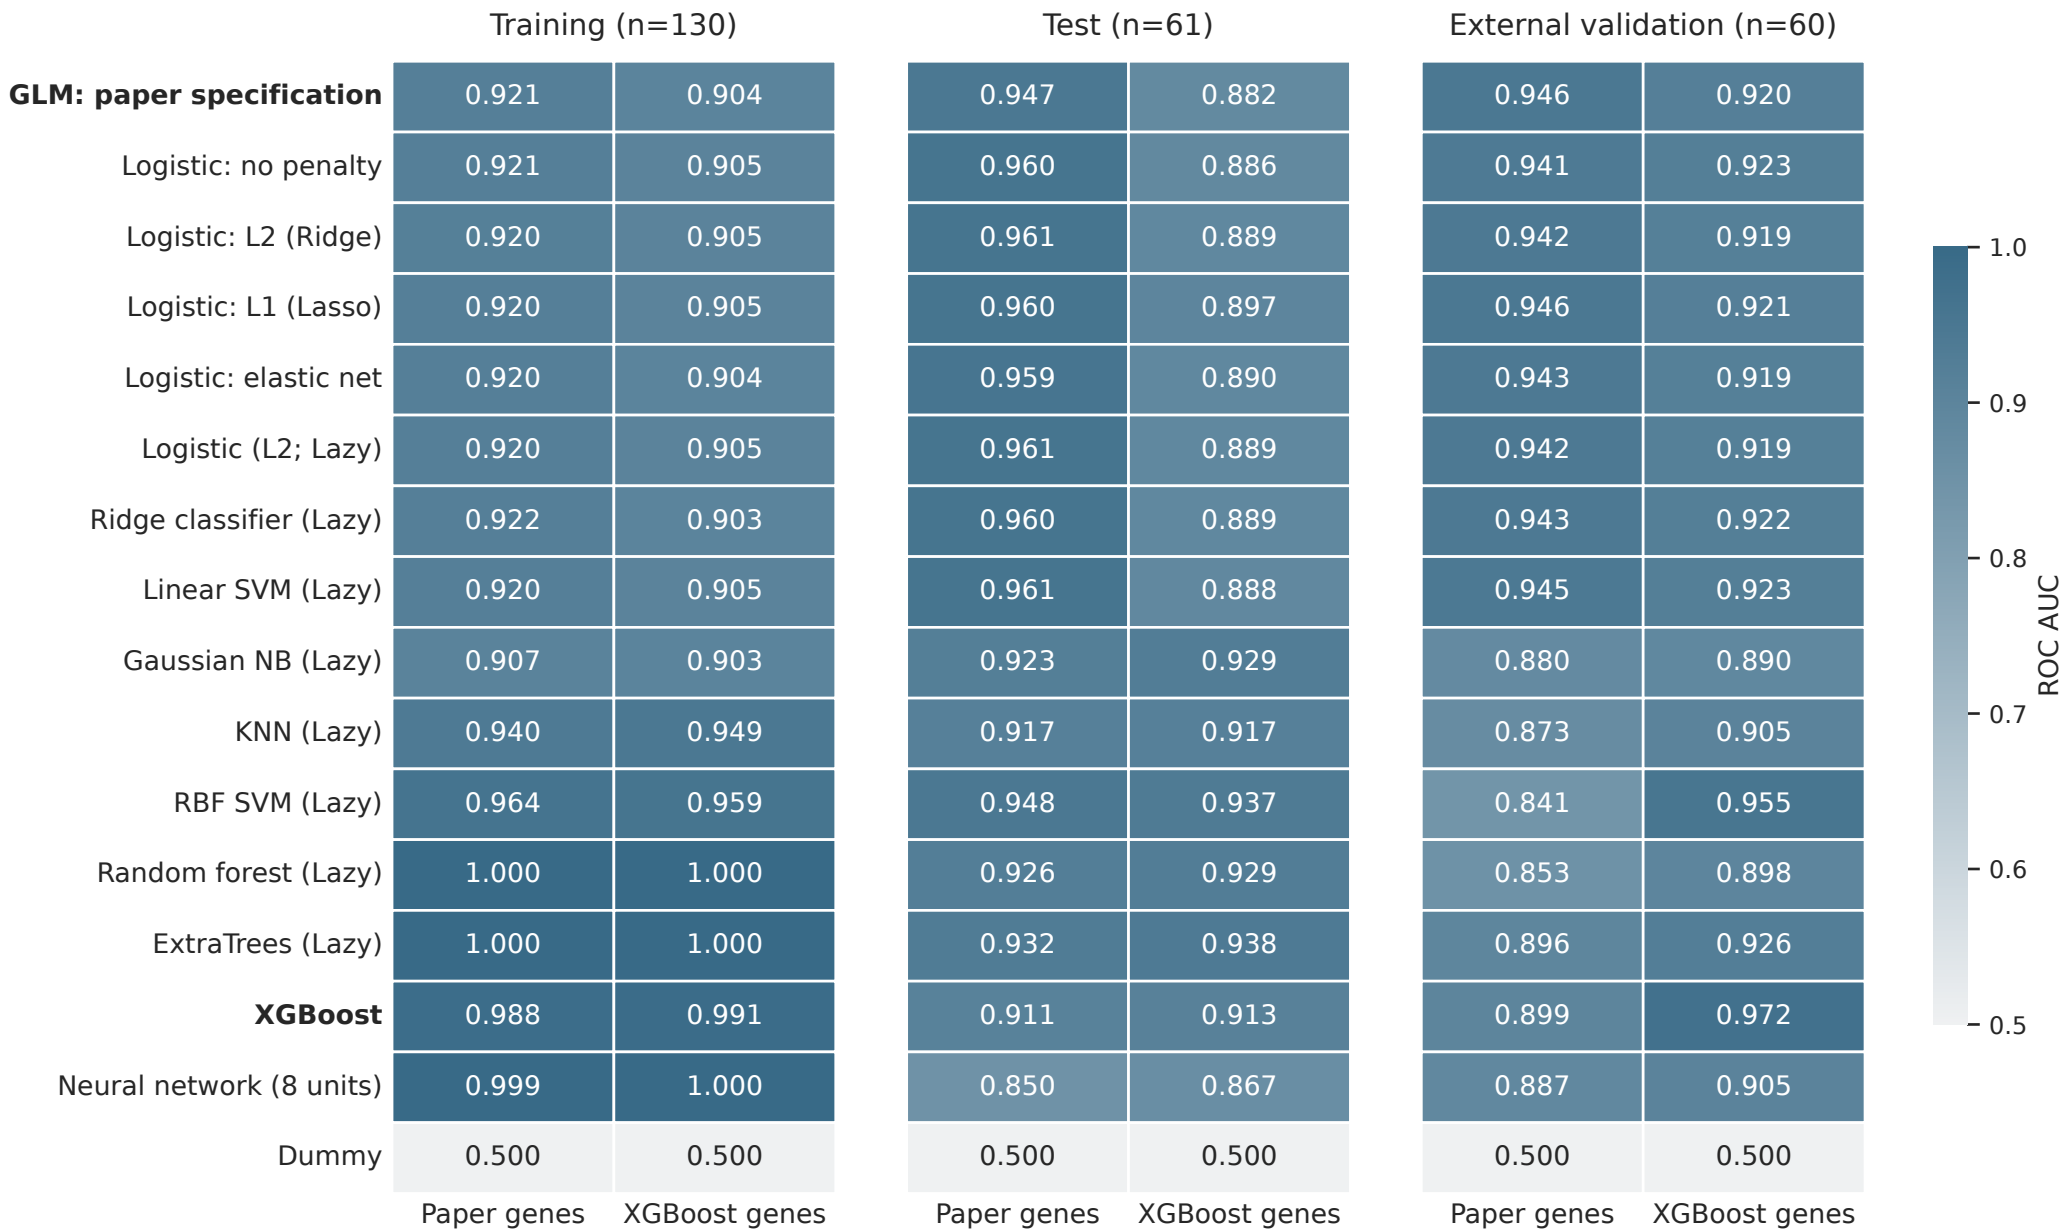
# Same models, two six-gene panels

All classifiers fitted on training participants only; fixed model settings



Paper genes: GBP5, BNIP3L, KLF6, DYSF, LASP1, PCBP1

XGBoost genes: GBP5, AHNAK, JMJD1C, MNDA, LYZ, SPI1 (CV forward selection)

Matched participants and VST protocol. AUC 0.5 = chance; 1 = perfect ranking.
Point estimates only; test and validation results have already been inspected.
