Selected genes occupy overlapping and complementary annotations
MSigDB 2026.1 · filled cells are membership, not activity
GBP-mediated host defense
Interferon gamma signaling
Neutrophil degranulation
Antimicrobial peptides
Granulopoiesis regulation
RUNX1 / stem-cell differentiation
Allograft-rejection response
IL2 / STAT5 response
Megakaryocyte / platelet production
Heme metabolism
Apoptosis
Hypoxia
Inflammatory response
TNF / NF-kB response
Smooth-muscle contraction
mRNA splicing
mRNA 3′-end processing
